

Think of us as Success Security.

Protecting Teams is insurance for achievement. Actually, you protect your team by equipping them with the tools required for organizational success ... and by creating goals and objectives your team members can feel excited about achieving.

Protecting Teams provides success security for your enterprise. Here's what the program will do:

- Effectively align your organization.
- Help each member of your team get on the same page.
- Reduce wasted time, effort and energy.
- Improve workplace communication.
- Build emotional maturity and create greater team member job satisfaction.
- Help team members define their role in your organization's success, so that they know what to do ... *and what to do next.*

All these benefits accrue to the bottom line of your enterprise. You recoup your investment in our program in just a few weeks.

It's time to start shaping the organization you want with the people you have. They're capable of doing the job and willing to work hard ... but you have to equip them with tools for success.

Think your team knows where you're going?

Think again! According to the Institute for Corporate Productivity, fewer than half your employees can remember your company's mission statement. In most organizations, the actual figure is around 10%.

If that doesn't scare you, it should.

If team members can't even remember your mission statement, it's a sure bet they have no idea where you want to take the organization ... or the steps they're expected to take to help you get there.

Protecting Teams excels at doing one thing: Coalescing the team. You can't do that at a retreat, and you can't do it while team members climb a rope or scramble through a jungle gym. You can only coalesce your team by identifying key objectives and developing action plans that will take your organization where you want it to go.

If you and your employees are not making the progress you want to make and are capable of making, we're willing to bet that your team's goals are not clearly defined. Our program helps you and your team get on the same page. The inevitable result is greater success for everyone involved.

The logo for "Protecting Teams" features the word "PROTECTING" in blue and "TEAMS" in gold. A blue circular arrow graphic surrounds the letter "I" in "PROTECTING".

PROTECTING TEAMS

A background image showing several interlocking grey gears. In the foreground, a hand is visible, appearing to be in the process of turning or adjusting one of the gears.

Your Challenge: Team Cohesion.

Most executives and business owners work for years without ever being able to coalesce their team.

That's because ordinary business education never really equips owners and managers with the tools for team cohesion.

Protecting Teams is a new kind of team development program. We use modern learning techniques and five weekly hour-long facilitation meetings. The course content is simple, effective, and reaches across team boundaries to include everyone who contributes to your organization's success.

Protecting Teams features four unique learning segments. Content for each segment is communicated via a printed lesson manual and audio files that are delivered weekly via e-mail.

During the week, you apply the ideas and strategies presented in each segment.

At weekly facilitation sessions, you'll have an opportunity to quantify your time savings. You and other participants will share success stories and new ideas for increased productivity.

Our program helps you create maximum benefit from the hours you spend at work. **Protecting Teams** is an exceptional investment for you and your enterprise.

Go From Cluttered Mess to Organizational Success in 28 Days!

The reason most businesses run in haphazard ways is pretty simple: Team goals are vague, unformed, and poorly communicated. If you're fed up with the chaos in your workplace, we're ready to help.

Here's how **Protecting Teams** will work for you:

Segment One: Where Is Your Team? helps you and your team members create a new achievement perspective and focus on your strengths. Perhaps most importantly, team members learn to identify the *Yeabuts* who can sabotage individual and group achievement strategies.

Segment Two: What Will Your Team Achieve? helps you and your team identify the ten most important challenges for achievement during the next 12 months. Use team member input to help develop a *Top Ten List* for your organization, then test each item for the *Success Criteria* that help ensure a positive outcome.

Segment Three: Planning for Success Every achievement carries a burden of cost that goes far beyond dollars and cents. You and your team members learn to calculate the true cost of reaching the items on your *Top Ten List*, then fine-tune the *Achievement Strategies* you develop.

Segment Four: Finding Time to Achieve paves the way for getting more done in less time. You and your team members have set challenging goals; now learn how to measure commitment, assess intention and avoid conflict. This final Segment also teaches the four *Cardinal Rules of Productivity* that, when followed, help ensure long-term success.

Get Started Today!

Protecting Teams creates dividends from your most neglected asset: Team cohesion. Rewards include an increase in organizational productivity, a measurable improvement in team member performance, and – most importantly – an increase in morale and achievement drive.

In just 28 days, **Protecting Teams** can transform your team from disorganized confusion and chaos to an achievement-driven organization. Best of all, the program is affordably priced so that every member of your organization can participate.

Can you *really* afford not to have all your team members on the same page?
